

Facilitate Software Ltd Announces OEM Partnership with Client Technologies Ltd.

London, UK 02/04/07 – Facilitate Software Ltd. recently announced the signing of a strategic partnership with Client Technologies Ltd, a UK-based solutions firm.

Joining with Client Technologies serves to expand Facilitate Software's already extensive product and service line by introducing a full range of IT products and services that compliment our partners' product portfolio. "We are always seeking innovative ways to meet the customer information management' needs of the business community," **explains the Channel Director of Facilitate Software Ltd "Creating a distribution network was our next logical step as a full CRM solution provider."**

The new partnership also provides Client Technologies the opportunity of expanding their customer base. Client Technologies have the opportunity to create a reseller network across the United Kingdom & Ireland. John Paul Andrade, CEO of Client Technologies, states "The strategic partnership between Client Technologies and Facilitate Software is based upon a common business philosophy of excellent customer service and highly reliable, cost-effective solutions. **With the need to convert our existing customers Clientele systems onto the latest .NET technologies the opportunity to leverage Facilitate Software's structured offshore development operation was also a significant factor in our decision to take on this partnership.**" Client Technologies clients are already experiencing the benefits that this partnership has created.

Both Facilitate Software Ltd and Client Technologies Ltd. look forward to building their partnership and providing the greatest value to their clients. "Access to key customer information in a timely manner is the platform that strong supplier – customer relationships are built on. At Facilitate Software, it's all about expanding access to high quality business solutions, we want to ensure that our clients can count on Facilitate Software for all of their customer information system needs and this partnership is just one example how assertively we pursue that goal."

About Facilitate Software Ltd

With over 10 years experience of the CRM marketplace and commercial pressure from our customers our aim was to meet the needs of the SME organisations with the emphasis in placing the DIARY at the heart of the CRM functionality. Facilitate⁺ has enabled us to meet our customer needs.

In addition to the development of CRM solutions, Facilitate Software takes the strain off our customers when the need arises to develop applications in a cost effective manner via outsourcing. With partners in the America's, Eastern Europe and Australasia, Facilitate Software will manage the whole project including negotiation and the risk involved in outsourcing your development needs.
